

Para montar el FS en el cliente

Instalar paquete ceph-fs-common

Crear las credenciales en el server

```
ceph auth caps client.user1 osd 'allow rw pool=cephfs_metadata, allow rw pool=cephfs_data' mds 'allow rw' mon 'allow r'
```

```
ceph auth ls
```

```
client.user1
```

```
key: xxxxx==
```

```
caps: [mds] allow rw
```

```
caps: [mon] allow r
```

```
caps: [osd] allow rw pool=cephfs_metadata, allow rw pool=cephfs_data
```

Montar en el cliente

```
mount.ceph monhost1,monhost2:/mnt -o name=user1,secretfile=/etc/ceph/user1.key,mds_namespace=cephfs
```
