

Lo mas importate es que todo el trabajo con una GAL debe hacerse en el storage donde este guardada la GAL

[https://wiki.zimbra.com/wiki/Steps\\_to\\_make\\_two\\_domains%27\\_GAL\\_available\\_for\\_each\\_other](https://wiki.zimbra.com/wiki/Steps_to_make_two_domains%27_GAL_available_for_each_other)

[https://wiki.zimbra.com/wiki/Steps\\_to\\_add\\_and\\_remove\\_datasource\\_from\\_GAL\\_account](https://wiki.zimbra.com/wiki/Steps_to_add_and_remove_datasource_from_GAL_account)

```
zmprov getDataSources galsync@uclv.edu.cu

cd /opt/zimbra
source bin/zmshutil; zmsetvars

zmgsautil addDataSource -a galsync@uclv.edu.cu -n AnotherGAL --domain
uclv.edu.cu -t ldap -f _AnotherGAL -p 6h

#para borrar un datasource
zmprov deleteDataSource galsync@uclv.edu.cu AnotherGAL

#para ver los contactos en el dominio zimbra.uclv.cu
zmprov mds galsync@uclv.edu.cu AnotherGAL zimbraGalSyncLdapBindDn
$zimbra_ldap_userdn zimbraGalSyncLdapBindPassword $zimbra_ldap_password
zimbraGalSyncLdapFilter
'(&(mail=*)(zimbraAccountStatus=active)(!(zimbraHideInGAL=TRUE)))'
zimbraGalSyncLdapSearchBase dc=zimbra,dc=uclv,dc=cu zimbraGalSyncLdapURL
ldap://mail-ldap-1.uclv.cu:389
```

después de esto debe verse algo asi mas o menos

```
zmprov getDataSources galsync@uclv.edu.cu

# name AnotherGAL
# type gal
objectClass: zimbraDataSource
objectClass: zimbraGalDataSource
zimbraCreateTimestamp: 20170902142734.920Z
zimbraDataSourceEnabled: TRUE
zimbraDataSourceFolderId: 15971
zimbraDataSourceId: 80ebe048-a1f0-4cb2-9050-6c8d90e001e6
zimbraDataSourceName: AnotherGAL
zimbraDataSourcePollingInterval: 6h
zimbraDataSourceType: gal
zimbraGalStatus: enabled
zimbraGalSyncLdapBindDn: uid=zimbra,cn=admins,cn=zimbra
zimbraGalSyncLdapBindPassword: *****
zimbraGalSyncLdapFilter:
(&(mail=*)(zimbraAccountStatus=active)(!(zimbraHideInGAL=TRUE)))
zimbraGalSyncLdapSearchBase: dc=zimbra,dc=uclv,dc=cu
```

```
zimbraGalSyncLdapURL: ldap://mail-ldap-1.uclv.cu:389
zimbraGalType: ldap
```

si no está habilitada hacerlo

```
zmprov mds galsync@uclv.edu.cu AnotherGAL zimbraDataSourceEnabled TRUE
```

forzar la sincronización

```
zmgsautil forceSync -a galsync@uclv.edu.cu -n AnotherGAL
```

mostrar las cantidades

```
root@mail-storage-1:/opt/zimbra# zmailbox -z -m galsync@uclv.edu.cu gaf
      Id  View      Unread  Msg Count  Path
-----  -
      1  unkn         0         0  /
